Aphasia Treatment: A Clinically-oriented Update

Audrey Holland

Arizona University, Tucson, U.S.A.

This talk will cover three themes that are influencing aphasia treatment today. These themes are related to 1) what we are learning about language processing and the brain; 2) advances in technology and what we are learning about the brain as well as technological advances that are influencing the provision of therapy; 3) the influence of the disability movement on rehabilitation. Exaples will be presented and each topic will be discussend in detail, although the last topic will be emphasized.
